Subject: Microsoft Settlement

Greetings

I feel the proposed settlement is tough but fair. I feel the company is being penalized for being creative and successful, but I certainly welcome competitive creativity when, where and if available. As a computer user my world has been greatly expanded due to programming available to me, a 59 year old. Obviously this has made for geometric growth in our economy as well. Let's hope this agreement does not send us backwards but opens new doors for more users.

Thank You, Jimmy Sober
